INTERNATIONAL PETROLEUM ABSTRACTS

INCORPORATING

OFFSHORE ABSTRACTS

International Petroleum Abstracts incorporating Offshore Abstracts provides an extensive review of the onshore/offshore oil and gas industry. Literature concerning oil and gas exploration and development, petroleum refining and products, economics, and offshore technology is covered. This selective compilation includes geology, geophysics, drilling, production, transport, refinery processes, analysis and testing, gas, oil, and bitumen.

Material relating specifically to all those involved in, or manufacturing for the offshore oil and gas industry is presented. Topics such as structural engineering, maintenance, underwater equipment, metallurgical research, corrosion and cathodic protection, batteries, turbines, arctic environment, health and safety are included.

This information is abstracted from a world-wide coverage of scientific and technical journals, conference papers, research reports, trade literature, standards and patents. The abstracts, which are indicative and partially informative, provide a comprehensive information service, which in combination with online access to the database via the Pergamon Orbit host, provides a key to all aspects of the petroleum industry.

Each volume lists the periodicals regularly scanned, together with detailed subject and author indexes.

EDITOR Gretchen E. Taylor

Subject Index to Volume 20

Absorption and Adsorption
acetylene adsorbed on Pd/Al_2O_3 *236*
LICOSEP technology *636*
pressure swing adsorption *210*
sterically-hindered amines *209*
Additives
boundary lubrication role *1224*
inverse micelles *1223*
lithium *1734*
methylchloro/methyl-isothiazolone *758*
molybdenum dithiolate *1225*
1,2,4-thiadiazolidine *1222*
phosphate *1226*
polychlorinated biphenyls *1228*
polyethers *1227*
polyethylene glycol stearates *1221*
sulphonates *1717*
Alkylation
efficiency improvement *1174*
isobutane *1173, 1174, 1678*
light olefins to isobutane *1678*
side-chain cleavage *643*
toluene *1679*
Alternative Energy
wind-diesel power generation *1477*
Analysis
alkylbenzenes *1694*
atomic absorption *1691*
bitumen *1693*
chromatography *248, 664, 667, 669, 670, 1194, 1694, 1744*
colloidal system *665, 666*
colorimetry *1692*
crude naphtha—analysis *669*
crude oil residues *1693*
cryogenic techniques *1191*
dropping point of grease *1696*
ferrography of lubricants *1213*
gas analysis in mud *44*
gas chromatography/mass spectrometry *1194, 1196*
hydrocarbons in lubricating oil feedstocks *1196*
lead in petrol *1691*
LASER technology *1192*
liquid extraction *248*
lube oil insolubles *1191*
mass spectrometry *1694*
near i.r. spectrophotometry *1195*
neutron diffusion *665, 666*
polyphenol ether oxidation products *1193*
polymers *665*
reservoir fluid solid precipitation *1192*
scanning-electron microscopy *41, 668*
spectrometry *246, 1694, 1695*
traces in flue gas streams *250*
u.v. fluorescence spectroscopy *247*
zanthan determination *1692*
Asphalt
flash pyrolysis technique *757*
pitch in argon/hydrogen plasma *1733*
precipitation by gas injection *1732*
Australia
Amadeus Basin *27*
Bonaparte Basin *36*
effect of Piper Alpha on industry *409*
Exmouth Plateau *26*
Harriet field *286*
natural gas—energy source review *921*
offshore development *286–288*
permittees *5*
petroleum regimes *476*
pipelines—natural gas industry *399*
Automotive Engines
compression ignition engines *693*
combustion modelling of piston engines *915*
fluid dynamic modelling of piston engines *915*
friction prediction model *916*
lean-burn development *914*
marine propulsion *1935*
Bearings
corrugations *1058*
cryogenic journal bearing *1060*
cylinder roller *704*
dynamic loading *715*
EHL films on bearings *722*
fatigue *265, 700*
grease *1715, 1716*
hydrodynamic test facility *711, 1060*
hydrostatic journal bearings *699*
inertia forces—influence *1059*
journal bearings *699, 735, 1060, 1210*
linear *713*
mill bearings *720*
rectangular finite slider *712*
thrust bearings *700, 707, 715, 735*
thrust pad bearing *707*
turbo-pump bearings *1203*
twin axial groove *717*
Bitumen
analysis *1693*
blown bitumen production *273*
burning in oilfield steam *1220*
cost analysis—*in situ* extraction *753*
enhanced recovery *549*
fractionation and characterization *1731*
ignition behaviour—tank deposits *1730*
pipeline transportation *607*
reserves and production *756*
steam/air injection recovery *1004*
surface discharge *1539*
upgrading and transportation *754*
viscosity prediction *755*
Whiterocks tar-sands *1731*
Canada
Brassey oilfield *1493*
BC Gas *1620*
development—heavy crude and bitumen reserves *754*
Eastern Canada—offshore progress *292, 762*
energy use down in 1990 *949*
Magdalen Basin *25*
Manitoba—E & P *1498*
Medicine Hat gas field *496*
natural gas liquids—supply and demand *673, 674*
offshore development *1231, 1232*
oil and gas deregulation *936*
pipeline activity—rapid pace *1112*
polar shelf exploration *279*
US–Canada Free Trade Agreement—oil and gas implications *959*
Winter field *527*
Carbon Dioxide
EOR flooding *68, 313, 531, 532, 545, 550, 991, 1522, 1573*
solubility in brine *1573*
Casing
casing collapse *983*
casing setting depths *519*
completion and evaluation of cased wells *581*
corrosion monitoring *355*
cracking of couplings *1608*
depth selection method *311*
Catalysts
aluminium borate *229*
carbons as catalyst supports *642*
Cyclar process *1172*
Cu-ZnO *1677*
$Cu\text{-}ZnO\text{-}Al_2O_3$ *219*
deactivation kinetics *1168*
FCC *225*
gallium-silicate *1676*
H_2SO_4 *1173, 1174*
La_2O_3 + bromide *220*
lube hydrofinishing catalyst *1175*
naphtha-reforming *1674*
Ni-Mo *1673*
$Ni\text{-}Mo/Al_2O_3$ *231*
$Ni\text{-}W\text{-}Al_2O_3$ *1169*
pre-heat treatment *1171*
regeneration of spent catalysts *223*
NaCl *1180*
thiophen poisoning *1168*

titanium silicate *1167*
vanadium-phosphorus oxide promoted with Co and Mo *221*
V_2O_5-TiO_2 *1171*
ZSM5 zeolites *222, 648*
Catalytic cracking
additives improve FCC process *1164, 1165*
catalytic hydrodemetallation *226*
de-NO_x *227*
FCC *214–216, 225, 1162, 1164, 1165, 1669*
kinetic modelling *217*
low olefin routes *639*
metal contaminants *214*
methanol conversion *1163*
N_2O emission *1669*
non-conventional feedstocks *212*
olefin metathesis *1670*
partial oxidation of natural gas *213*
regenerator heat removal *1165*
resid upgrading *640*
riser design *215*
zeolite acidity optimization *216*
Catalytic Reforming
catalytic hydrodemetallation *226*
biomass pyrolysis *641*
isobutylene production *1672*
kinetics *218*
naptha pyrolysis *1166*
reforming catalyst from spent material *1671*
syngas *219*
vapour phase dehydration *1672*
Cathodic Protection
aboveground tank bottoms *1123*
computerized monitoring *1604*
oilfield brine *1061*
Cements and Cementing
cement evaluation *982*
cement filtrates cause damage *513*
concentric casing strings *983*
expanding *1499*
foamed cement characterization *52*
formation damage *513*
rock interaction *523*
slurry models *523*
swelling
Chemical and Physical Refining
aromatic hydrocarbons *1700*
boiling point—molecular weight relation *1190*
extractive flocculation *663*
fire-resistant hydraulic fluids *1189*
friction-tester *1188*
grease—dropping point *1697*
heat capacity calculation *1187*
hydrodemetallation modelling *239*
hydrodenitrification modelling *239*
hydrodesulphurization modelling *239*
pure acyclic alkanes *1699*
research octane number *1699*
residue conversion *1690*
waste lubricating oil *663*
China
experimental wave-power plant *1445*
rising offshore oil production *954*
Yacheng offshore gas field *1743*
Coal
petrological examination *1729*
solubility in benzene *1728*
Spanish coal—inorganic constituents *1727*
Coal Hydrogenation
coal tar *272*
Coal Liquefaction
economics *1726*
syngas from coal *749*
Coatings
concrete/urethane foam *1064*
double-wrap tape *1063*
epoxy *1605*
internal plastic coating *1065*
pipelines *1062–1064, 1066, 1605*
quality control *1066*
surface preparation *1062*
Coke
coke petroleum residua tests *751*
formation control *752*
needle-coke production *271*
shot coke *751*
sponge coke *751*
world markets *750*
Computer Applications
advantages—positive or negative *464, 465*
artificial intelligence *908*
BALISS—geologists tool *508*
CARDHAT—expert system for offshore safety assessment *1361*
chemical plant control *1948*
corrosion control system *913*
COUPLA software *564*
data acquisition for high-temperature tribometer *1451*
data from process simulations *1452*
EDI—electronic data interchange *1928*
environmental auditing *1957*
EVACSIM/EVADE—offshore evacuation concepts *1369*
fire field model *1460*
FORM/SORM numerical techniques *370*
GLOBAL—drilling analysis *517*
journal bearing selection *906*
LOCACE—geologist's tool *508*
management strategies *907*
MHEM—wave force analysis *1382*
MIRIAM—offshore process plant *1366*
natural gas training *477*
networking field computers *1453*
offshore safety *1361, 1365, 1368, 1369*
painting maintenance *593*
pipeline monitoring *1111*
PLAIM—expert system *361*
pressure vessel management *466*
PLC technique *1923*
refinery information systems *1924*
reservoir simulation *577*
satellite communication system *1923*
SCADA *152, 165, 1623, 1625, 1632, 1919–1922*
training *477, 966*
wave induced response of compliant cylinder *372*
well data acquisition system *582*
Corrosion
a.c. impedance as 'field tool' *1073*
carbon steel in di-isopropanolamine *1067*
carbon steel in diethanolamine *1067*
casing design *1608*
computerized control system *913*
computerized monitoring *1604, 1606*
control—computer simulation technique *1074*
Cu-Ni alloy in sodium sulphide *1070*
detection in buried gas pipeline *1072*
double cantilever beam test *909*
electronic component degradation *1068*
H_2O scavengers *1073*
hydrogen embrittlement *1609*
line pipe steels *911, 1609*
materials selection for process piping *911*
microbial *912, 1607*
pipelines *910, 911, 1072, 1606*
steel in crude oil production *1071*
steel well head equipment *1069*
SCC cracking *909, 910, 1067, 1070, 1608*
sulphide stress cracking *1069*
Crude Oil
analytical data *1693*
asphaltene precipitation *1732*
Bombay High *251, 252*
characterization *1561*
Chinese *664*
Chinese crude oil analysis *664*
gel formation *251*
pipeline transportation of heavy crude *607*
pumps for highly viscous crude *611*
reserve estimation *1555*
reserves and production *756*
spiked crudes—shrinkage *1197*
upgrading and transportation *754*
vacuum distillate *252*
water content in crude *1698*
wax crystallization *251*
Desulphurization
Claus plant *234, 235*
flue gas *241*
mercaptans affect Claus units *234*
MTE sulphur recovery process *235*
reaction modelling *239*
seawater washing *241*
SO_2 emission—reduction and disposal *240*
Diesel Fuel
automotive *1701*
catalysts for exhaust gas *1701*
emissions *690–692, 694, 1701*
desulphurization *1706*
ethanol/diesel fuel oil emulsion *1198*
Distillation
acetone *1158*

fuel instability models *634, 635*
middle distillates *634, 635*
mixed solvent technique *207*
multicomponent column design *208*

Drilling
Abu Dhabi oilfields *984*
air drilling *1075, 1500*
API—tubular standardization *43*
Austin Chalk *39*
borehole caliper measurement *1501*
coiled tubing unit *985*
cratering *519*
directional air drilling *1075*
downhole motor *1075*
drill bit selection *528*
drilling-induced fractures *987*
drillpipe—lightweight steel *42*
drill pipe thread compound *1723, 1724*
dynamic chaos theory *523*
EOR applications *521*
formation damage *989*
gas analysis *44*
gas migration—combatting *988*
gas-rise velocities *516*
horizontal *39, 46–50, 521, 525–527, 543, 986, 1502*
horizontal core acquisition *986*
infill *514*
internal blowouts *519*
jet-bit—new nozzle *1506*
limestone shale penetration rate *984*
low-kick-tolerance wells *515*
MWD systems *51, 517*
Michigan basin *988*
mud/gas separators *518*
pore-pressure evaluation *517*
Rotherwood field, Texas *514*
self-resonating cavitation jets *522*
slim-hole control *524, 985*
slim-hole re-entry *985*
small-diameter wellbores *524*
smearing of a kick *45*
steerable drilling motors *40*
subsurface safety valve location *519*
underground flow well control *515*
vertical adjacent to horizontal *1502*
well-control *524*
well-failure mechanisms *1505*
wireline systems *51*

Drilling Fluids
additives—effect of *529*
ageing—effect of *529*
API quality programme *1504*
bentonite suspensions *529*
differential-pressure sticking *1503*
drilling-mud filter cakes *41*
fluid-loss polymers *41*
formation damage *989, 1043*
gas analysis in mud *44*
gas contaminated oil-base mud *45*
mysid shrimp test data *520*
palygorskite clay *38*
rheology *529*
rock interaction *523*
thermal stability *38*
toxicity prediction *520*
vinyl sulphonate copolymer *50*
water-based *529*

Economics
Asia-Pacific—natural gas development *472*
Asia-Pacific—petrochemical opportunities *942*
Australian natural gas—market potential *921*
British Gas expansion *470*
Canada—energy use down in 1990 *946*
Canada—oil and gas deregulation *936*
Caribbean refining—capacity advantage *929*
China—rising offshore production *954*
downstream development—Western Europe *932*
downstream offshore integration *938*
downstream profitability *931*
dynamic economic consideration of proved reserves *510*
electronic data interchange *1928*
environmental aspects *939*
financial innovation aspects *474*
France—growth in energy consumption sustained *952*
futures versus spot prices *922*
gas industry construction survey *1465*
gasoline—global market *1710*
Germany—energy demand for a unified country *951*
Hungary—petroleum processing industry *937*
hurdle-rates—financial market determinations *1469*
hydrocarbon resource thresholds *509*
Indonesia—oil-dependency on decline *955*
Japanese oil industry response to supply/demand *960*
Japan petroleum product supply *927*
joint upstream/downstream activities *930*
macroeconomic analyses *1470, 1471*
management of E & P production assets *1464*
management theory *1466*
marketing of grease *1720*
methanol prospects *473*
Mexican petrochemical reforms—US reaction *953*
multidisciplinary business teams *1464*
North American natural gas market *471*
natural gas—global aspects *1468*
Nelson–Farrar index changes *1474*
offshore activity forecast *1925, 1931*
oil and gas loans—risk factors *923*
olefins competition *1467*
oxygenate market *1930*
petrochemical industry strategies *940–942*
pricing options *1929*
refinery supply—Middle East oil prospects *925*
rig industry review *868*
petrochemicals—Asian economic growth *469*
post-war (1991) oil price analysis *943*
refineries—profit centres *961*
refining facilities—equity ownership *928*
regional integration *933*
reserves and probabilities *511*
Soviet investment—risks *926*
Spanish distribution freedom *935*
Sub-Saharan Africa—supply and distribution *933*
state-owned companies—trading environment *958*
strategic investment decisions *1929*
sunk costs—a value approach *924*
Thailand—energy consumption *1927*
Transpemex—programming model, supply and distribution *934*
upstream development *474*
US–Canada Free Trade Agreement *959*
US downturn in E & P *1925*
US drilling survey *1473, 1926*
US economic recession effects *1472*
US energy policies—effect on import demand *957*
US gasoline price at record low *948*
US gas supply and prices—long-term trends *947*
US natural gas industry in 1990 *945*
US oil demand *944*
US oil/gas production cost—changes *956*
US oil import vulnerability *946*
US refining—productivity growth *1463*
vertical integration *928*
world petroleum balance and prices *950*

Engine Fuels
auto/oil quality improvement *687*
biomass-derived *1704*
blending components *1735*
CNG *688*
cleaner fuels *1535*
diesel emissions *690–692, 694, 1701*
emulsified fuel *1198*
environmental health aspects *1709*
ethanol *688*
exhaust emission—effects of composition *682, 692–694*
FCC gasoline octanes *1702*
fuel oxygenates *684*
gasoline volatility effects *682*
global market *1710*
hydroperoxide formation *695*
jet fuel *695*
LPG
locomotive—methane fuel *1708*
methanol from syngas *1705*
methanol utilization *685*
monitoring consumption *258*
octane enhancement *686*
pollutant emission levels *690–692*

processing for the 1990s *689*
rape seed methyl ester *259*
reformulated *684*
silicalite as exhaust adsorbent *696*
syngas *1703*
TAME—blending agent *1707*

Engine Oils
additives for engine oils *274, 759*
diesel engine oil *759*

EOR
acid stimulation *992, 1520*
alkali/surfactant/polymer *553*
alkalinity loss *1001*
anhydrous methanol *1526*
bacterial cell transport *1525*
biopolymer *71, 530, 555*
bitumen—enhanced recovery *549*
CO_2 flooding *68, 531, 532, 545, 550, 991, 1522, 1573*
CO_2 foam viscosity change *532*
CO_2-methanol foam *1522*
characterization testing *533*
chemical flooding *551, 552*
Chinese state-of-the-art *80*
chromic-carboxylate acrylamide-polymer gels *990*
computer tomography *547, 1517*
conversion—steam stimulation to steam drive *542*
deep-bed filter media *1507*
drilling information *521*
dual-injection methods *995*
dual surfactant systems *79*
electomagnetic heating *1531*
foam fracturing *1522, 1527*
foam in cyclic steam injection *67*
foam stability *1511*
Ford Geraldine Unit *545*
formation damage *554, 1521, 1525*
gel conformance treatment *990*
gel placement *74*
heavy-oil reservoirs *1531, 1533*
heterogeneities characterization *1517*
heterogeneity—effect of *1564*
history-matching simulation *993*
horizontal *543, 1515, 1520*
hot-water-driven alcohol slug *81*
hybrid injection processes *531*
hydraulic fracture growth *76*
hysteresis effects *1512*
immiscible displacement *78*
injection profile control *71, 74*
in situ gelation *530*
in situ saturation *533*
Kern River field *993*
limiting capillary pressure *1527*
lost injectivity *69*
matrix stimulation *72*
micellar flooding *1512*
miscible enriched-gas drives *70*
miscible flooding *70, 534, 535, 546, 547, 550, 1519, 1529, 1530, 1543*
multistage matrix acid *1524*
multitap long-core permeameter *992*
novel combinations *544*
permeability modification *530*
Ploen-Ost field *1528*
polyacrylamide *73*
polymer flooding *73, 997, 1508, 1509, 1514, 1528, 1571, 1572*
PNC log monitoring *75*
refinery flare gas for miscible flooding *546*
relative permeabilities *1510, 1512*
residual oil saturation *77*
salinity gradient *1513*
sandstone acidization—optimization *1005*
scale inhibitors *68*
scaled physical modelling *537*
scleroglucan *997*
simulation—numerical *1534*
softening of water for steam *1523*
solvent viscosity *1529*
state-of-the-art *80*
steam/air injection *1004*
steam flooding *75, 993, 995, 996, 1002, 1004, 1515, 1518*
steam-foam formulations *538*
steam/oil/water systems *537*
steam quality monitoring *1002*
steam simulation conversion to steam drive *542*
steam soaking *536*
surfactant flooding *551, 552, 556, 994, 1513*
surfactant/polymer field test *998*
surveillance techniques *540*
synthetic copolymer *1528*
thermal recovery *543, 1523*
tracer particles dispersion *1543*
underground drill sites *548*
USSR techniques *539*
walnut shell granules *1507*
water blocking *535*
water control polymer *1509*
water flooding *69, 76, 77, 540, 1000, 1003, 1022, 1516*
WAG injection *531*
well abandonment on EOR potential *541*
wellbore steam segregation *996*
wettability effects *1530, 1532*
xanthan/chromium gels *999, 1508*

Environmental Aspects
air *478–480, 971, 1478–1483, 1535, 1538*
bitumen—surface discharge *1539*
Clean Air Act *1076, 1536, 1538*
cleaner fuel manufacture *1535*
land *1539*
legislation *475, 623, 1076 1536–1538*
oxygenate impact *1538*
pipelines *1536*
refining—cost of cleaner fuels *1535*
storage tanks *1536*
US federal laws *1537*
urban oilfield operations *82*
waste-contaminated soils *83*

Equipment—General
flowmeters—field calibration *589*
flow-rate measurement equipment *588*
perforating charge performance *1077*
piston gas prover *589*
pressure measurement equipment *588*
thermocouple reliability *1610*

Ethane
seals—flue gas desulphurization *130*

Ethanol
engine fuel *685*
lethality study *1950*

Ethylene
adsorbed on Pd/Al_2O_3 *236*
oligomerization of ethylene *1177*
thermal cracking *637*

Exploration
Pakistan *512*

Fischer-Tropsch Synthesis
fixed-bed reactor *1179*
iron-promoted catalysts *642*
SASOL wax *1185*
shift catalyst *661*
synthol process *1179*

Fluid Flow
analytical formulae *86, 1541, 1544, 1547*
annular flow *559*
capillary diffusion zone *1541*
capillary pressure curves *585, 1013, 1014*
colloidal silica gel solves problems *560*
dual-porosity effects *562*
expansibility factor *92*
flow behind the slug front *1007*
flowmeters *92*
fluid saturation levels *1542*
foam flow in sandstone *87, 1009*
foam flow through oil-wet porous medium *1010*
formation damage effects *89*
horizontal two-phase *85*
horizontal well flow *85, 86, 88–90, 1544*
hyperbolic fluid transient equations *1012*
inflow performance *86, 90*
influence of texture on foam flow *1009*
inner pipe eccentricity *93*
in porous media *557, 562, 564, 1008, 1010, 1011, 1014*
linear flow in naturally fractured reservoirs *84*
measurement *85, 91*
modelling *557, 559, 1008, 1543, 1546*
multiphase thermal flow *1008*
nodular system *1545*
non-Darcy flow effects *558*
numerical simulation *1007*
oil/water flow profile *88*
partially open horizontal wells *86*
permeability reduction *1011*
pipeline flow *563*
porothermoelastic behaviour *564*
sodium bentonite suspensions *561*
surge pressure *93*
two-phase flow model—flare network design *1006*
two-phase flow through wellhead chokes *1015*
viscous dissipation *1547*

viscous fingering *1540, 1546*
water flow behind casing *91*

Fracture Mechanics
acid refracturing programme *1018*
bottomhole treating pressure *1019*
encapsulated breaker for proppant slurry *1020*
fracture asymmetry *1550*
fracture design and validation *109*
fracture diagnostics *1025*
fracturing slurries *107, 1020*
hydraulic fractures *110, 111, 1016, 1017, 1021, 1022, 1548, 1549, 1599*
microfracturing implementation *1548*
minifracture tests—case study *1026*
proppant flow *1021*
rheology of fracturing fluid systems *1023, 1024*
stimulation-fluid systems *108*

Gas
compressibility factor calculation *255, 256*
compressor station upgrade *149*
construction survey *1465*
double-wall piston prover *145*
dehydrator units *253, 254*
energy determination *242*
gas cooling—advanced technologies *680*
hydrate formation control *671, 672, 789, 790*
LNG heat transfer aspects *633*
mobile gas meter *140*
natural gas—chemical conversion *677*
natural gas—dehydrator units *253, 254*
natural gas—electricity generation *678*
natural gas—future demand overview *679*
natural gas—global aspects *1468*
natural gas—hydrate formation *671*
NGL in Canada *673, 674*
natural gas mixtures—compressibility *681*
natural gas mixtures—supercompressibility *681*
natural gas—network analyses *1631*
natural gas—nitrogen in *257*
natural gas—processing technology *675*
natural gas—reserves *676*
natural gas—trace mercury *1199*
natural gas—transportation fuel *688*
natural gas—underground storage *619*
nitrogen in natural gas *257*
pipes and pipelines *134, 135, 148, 150–155, 157–161, 165–167, 170, 597, 598, 600, 1098–1100, 1103–1105, 1110, 1112–1114, 1620–1624, 1626–1628, 1631–1633*
SCADA *141, 152, 165, 606, 1623, 1632*
structural packing in dehydrators *253*
Sulfa-scrub process *1200*
unaccounted-for gas loss *142*
underground strorage *619*

Gas Oil and Fuel Oil
asphaltene dispersion *1711*
combustion modelling *1711*
distillate fuel oils—residential use *697*
catalytic hydrotreating *1169*
gas oil—residual fuel blends *698*
peat/water/oil mixture—liquid fuel *260*
resistant nitrogen in gas oil *667*

Geographical Distribution
Albuquerque Basin *24*
Amadeus Basin *27*
Anadarko Basin *10*
Aomori Basin, Japan *1488*
Bonaparte Basin *36*

Western Australia permittees *5*
West Siberia *13*
Williston Basin *23*
world oil and gas resources *495*

Geology
borehole stability *1489*
carboniferous *33*
clastic gas reservoirs *491*
Cosserat micro-structure *1489*
Cretaceous *30*
crustal *19, 22, 23, 25, 26, 33*
eolian sandstone outcrops *979*
extensional structures *12*
formation isopacks *980*
kerogen structure *1490, 1491*
lithospheric deformation *11*
mathematical models—time factor *493*
Miocene siliceous sediments *1488*
Moho *22, 32*
Neogene *35, 1488*
Paleozic *1, 3*
Permian-Mesozoic *29*
permo-carboniferous rifting *26*
Phanerozoic *23*
random permeability fields *979*
reservoir heterogeneity *492*
sequence analysis *494*
Silurian Qusaiba shale *1*
subsidence without stretching *13*
tectonic *15, 27, 980*
tectonic history *980*
Toarcian shale *490*

Geophysical Exploration
acoustic well logging *1494, 1495*
automated rock characterization *504*
Brassey field *1493*
capillary pressure analysis *1497*
COCORP *22*
deep seismic profiling *8–35*
ECORS data *34*
fluid displacement effects *1492*
fluorescence microscopy *6*
full-waveform sonic data *1494*
gamma ray spectroscopy *505*
geodynamic modelling *11, 14*
geostatistical technique *501*
gravel-pack quality *506*
gravity modelling *19*
integrated approach *500*
log analysis *498–500, 502, 505, 1492*
log-inject-log tests *1492*
magnetic modelling *19–21*
magnetotelluric methods *20*
Medicine Hat—100 years on *496*
multiwave seismic *16*
petrographic study *6, 1497*
pulsed-neutron-activation *506*
quantitative basin analysis *503*
reserves assessment *497*
reservoir characterization *500–502*
scanning electron microscopy *504*
seismic *8–35, 500–502, 507, 508*
slim-hole cores *1496*
spontaneous potential measurements *7*
stratigraphic trap evaluation *507*
thermal basin modelling *9*
two-stage stochastic model *981*
well logging advances—cased hole *499*
well logging advances—completion technology *499*
well logging advances—open hole *498*

Germany
energy in a unified Germany *951*

Hydrogenation
acetylene *228, 1170*
acetylene over Pd/Al_2O_3 *228, 1170*
benzene to cyclohexane *1176*
butyl benzene *1680*
effect of ammonia *1680*
heavy oil *644, 646*
hydrodesulphurization *229*
Iratishale oil *231*
kinetics of used oils *230*
naphthalene *1680*
oxyhydrogenation *652*
refinery residues *646, 647*
residue hydroconversion *645*

Industrial Hygiene
butyl benzyl phthalate toxicity *1461*
carcinogenicity of automotive emissions *1951*
chemical safety audits—plant safety *918*
epidemiological study *1953, 1954*
ethanol inhalation exposure tests *468*
exposure to oil mist systems *917*
lethality of methanol and ethanol *1950*
lubricant base stocks—toxicity tests *467*
plasticized PVC—thermal analysis *1462*
xylene inhalation exposure tests *468*
Isomerization
isomer distribution at equilibrium *232*
xylene kinetics *648, 1681*
Italy
natural gas system *166*
Po Plain *19*
Legislation
Argentine model contract *962*
Australian petroleum regimes *476*
Clean Air Act *1076*
Clean Air Act Amendments *1536, 1538*

stabilized drill collars *1749*
subsea BOP *771*
subsurface well collisions *772*
TLP drilling package *1233*
TOTAL—data acquisition system *309*
Trafor—new MWD system *1753*
turbodrill—balanced assembly *297*
two-riser system *1235*
underground blowout planning *1234*

Offshore Drilling Fluids
cationic fluid *1809*
environmental impact minimization *296, 358*
filter cake deposition *305*
friction pressure losses *310*
gas-hydrates inhibitor *1239, 1751*
inhibitive water-based muds *301*
oil-based mud emulsifiers *775, 1238, 1239*
toxicity test *1241*
water-based
copolymer/polypropylene glycol *1237*

Offshore E.O.R.
adsorption of surfactants *314–316*
borate gel *1763*
Brent core experiments *1758*
CO_2 + steam flooding *313*
computer-tomography analysis *1754*
conformance control gels *1759*
coreflood experiments *1754, 1758, 1760*
Ekofisk implementation *312*
fracturing fluid—improved *1763*
inaccessible pore volume *1758*
lignin-based surfactants *1755*
polymer retention *1758*
scale inhibitors *1761*
steamflooding + CO_2 *313*
surfactant systems *1754, 1755*
surfactant/WAG *1757*
thermally induced *778*
waterflooding *312, 1756*
WAG injection *1757, 1762*
well response *776*

Offshore Environmental Hygiene
arctic operations *347*
chemical treatments *1764*
drill fluid—minimize cuttings impact *296, 776*
FIESTA—monitoring system *1290*
GESAMP's remit *317*
MOSES—environmental surveys *1289*
North Sea monitoring master plan *1287*
produced water components *1765*
SEA-WATCH—surveillance and monitoring *1291*
tanker spill prevention by design *446*
waste disposal—biological effects *1288*

Offshore Fields
Auger *403, 1235*
Balmoral *328*
Beryl *786*
Brage *792*
Chanter *792*

Terra Nova *762, 874*
Tiffany *875*
Tordis *798, 1256*
Troll *322, 329, 330*
Trym *1854*
Tyra *774*
Ula *778*
Valdemar *774*
Viosca Knoll *1773*
Xijiang *1780*
Yacheng *1743*

Offshore Fluid Flow
Coriolis flowmeters *1809*
critical condensate saturation *319*
effects on erosion-corrosion *1244*
interfacial tension *318*
internal flow systems *1814*
multiphase technology *1767*
porous media *318*
turbulent *1244*
waxy North Sea crude *1766*

Offshore Fluid Mechanics
fluid-structure interaction *1292*
internal flow systems *1814*

Offshore Fracture Mechanics
analysis of cracks *1816*
coalescence in notches *1293*
composite structures—damage tolerance *357*
engineering materials and structures *1815*
fatigue crack growth *1293*
fracture toughness *1816*
general testing *1816*
interlaminar *357*
probability theory *1294*
recent developments *1816*
subcritical crack growth *1816*

Offshore Geology
crustal *280*
Kimmeridge clay—North Sea rock source *763*
Mesozoic *278, 282*
Nerlerk berm case history *761*
Paleozoic *282*
permafrost *1230*
Pliocene *284*
Pleistocene *284*
shallow gas—influence *1229*
three-phase soils *1229*
Upper Jurassic, Kimmeridge clay *763*

Offshore Geographical Distribution
Australia *286–288*
California C.S. *1741*
Caspian Sea *767*
Celtic Sea *281, 283*
China *1743*
Eastern Canada *292*
Grand Banks, Newfoundland *278*
Gulf of Mexico *290, 291, 766, 1739*
Jeanne d'Arc Basin, Newfoundland *277*
Mackensie Delta *764*
Newfoundland *278, 1740*
North Atlantic *285*
Nova Scotia *1742*
Sicily *284*
undiscovered oil and gas resources *289*
UK continental shelf *290*
Yukon territory—Mayo district *1230*

Offshore Geophysical and Geochemical Exploration
activity—increase *1736*
BIRPS project *280, 282, 283*
gravity data *281*
marine seismic vessels survey *1736*
positioning sensors *1737*
pulsed-neutron monitoring *276*
reflection data *277, 279*
sedimentological framework *763*
seismic *277–285, 1736–1738*
3-D seismic reservoir analysis *1738*
towed ocean bottom instrument *1417*
well test studies—integration *762*

Offshore Hydrodynamics
acceleration values *1300*

articulated tower response 846
bottom shear stress 1825
boundary element analysis 1820, 1826
buckling under combined loading 839
circular cylinders 366, 367, 372, 373, 379, 834, 836, 837, 839, 842, 843, 848, 1819
computational models 370, 372
crane ship response to wave groups 371
cylindrical cavity collapse 1831
design wave height 847
dimensional analysis 1833, 1834
drag-force approximations 376
dynamic response of simple offshore structural models 1821
dynamic response of undersea cable 374
dynamic stability of submerged cylinder 373
energy flux equalization 1838
ergodic wave processes 370
extreme response statistics 1299
first-order wave effects on submerged spheroid 378
fluid structure interaction 838
flume confinement effect 849
Fourier approximation method 1827
high speed vehicle 1829
hydroelastic analysis 1298
inclined cylinder 366, 848
interaction between two cylinders 379
inverse hydrodynamic interaction theory 1828
irregular wave kinematics 1827
irregular wave groups on piles 367
Keulegan–Carpenter parameter 844
kinematics 1300, 1301
kinematics of transient water waves 1300
linearized forces 381
long wave inducement 368
matrix manipulation 1833, 1834
measured force data 363
Morison-type wave loading 841, 1408
multiple floating bodies 845
nonlinear interaction 834
oblique impact of two cylinders 379
ocean wave model 1823
optimal linearization of wave loading 841
pile foundation response 1303
pile–soil–pile interaction 1302
platform's seismic response 840
radiation problems—analysis 382, 837, 838
random oscillatory flow 842
regular wave reflection measurement 375
rigid surface 1822
scour round vertical pile in waves 843
second-order wave diffraction 365, 378
second-order wave effects on submerged spheroid 378
ship slamming 1839
slender circular cylinder 836
spectral analysis 840
spectral wave-force predictions 376
stochastic linearization 1832
structural system reliability analysis 377
subharmonic oscillation 1836
submerged horizontal plate 1822
SWATH vessels 1840
TLPs 380, 833
turret-moored FPSO 1830, 1858
2-D flat-bottomed body 1824
undersea cable 374
vertical axisymmetric bodies 381
vertical circular cylinder 834, 849
viscous drift forces 846
vortex-induced TLP tether vibration 380
vortex model 372
water-wave radiation 1837
wave crest kinematics 1835
wave-current forces 836, 848
wave-current force spectrum 848
wave diffraction 365, 382, 1820
wave directionality 835
wave force computation 365, 1382
wave force-structure interaction 1836
wave group factors 367, 368, 371
wave groups—crane ship response 371
wave groups over a trench 368
wave induced response—compliant cylinder 372
wave interaction 364, 833, 834
wave interaction with rectangular pit 364
wave loading—multiple floating bodies 845
wave motion on horizontal submerged cylinders 373
wave spectrum 835
wave transmission and reflection 1822

Offshore Industrial Hygiene
cleaning oily drill-cuttings 776
environmental impact 296, 358
seafloor cleanup 1817
UKOOA procedure—drilling fluids 358

Offshore Instruments
downhole logging devices 1295

Offshore Maintenance
ageing structures—reinforcement 1380
concrete 1797
condition-based Forties maintenance 832
EDIPS system 362
expert system 361
inspection and repair 360–362
platform requalification 359
PLAIM—expert system 361
reliability-based fatigue model 360
robot for underwater 1818
subsea 362, 1297, 1818
subsea repair of concrete coating 1297
ultrasonic inspection 1296

Offshore Metallurgical Research
cast duplex stainless steel 1310
chromium-molybdenum steel 1841
cold forming welded T-sections 1308
copper-nickel butt welds 852
corrosion-resistant alloys 1306, 1307, 1309
environmental assisted cracking 1309
fatigue-crack growth 1841
life prediction of equipment 1305
mild steel grade St 52-3N 851
nickel in low-alloy steels 1309
sour-service alloys 1307
strain rate sensitivity 851
sucker rod couplings—wear simulation 850
TRIBONIC 20—wear simulation 850

Offshore Meteorology
Beaufort Sea ice field—atmospheric mechanisms 1311
climate monitoring and forecasting 1312
Met. Office services 883
operational models 383
subsea weather systems 1313
Vivaldi—wide-area survey 1313

Offshore Mining
Pitcairn Island marine mineral potential 1304

Offshore Navigation
continuous inertial navigation 1842
survey-data quality control 1842

Offshore Oceanography
axisymmetric waves 388
berm width 1314
Bretschneider sea states 386
classification of wave force 1844
deep ocean mapping—progress review 1320
directional wave spectra 1843
directionally spread shoaling waves 857
DRAKE—research vehicle 1318
Dutch Wadden Sea 1319
extreme wave heights 1321
hurricane seas simulation 384
irregular wave run-up 1314
JONSWAP sea states 386, 854
mesotidal inlet 1319
multi-directional random seas 855
near-surface current measurements 853
numerical morphological model 1319
ocean current investigations 1318
ocean spectra
propagation of long waves onto shelf 856
refraction-diffraction of short waves on island 387
sea-level pressure data—Southern Hemisphere 1317
solitary wave—2-D transmission

and reflection 1322
stationary sea state 1316
surface-active organic compounds—wave damping 858
water surface waves—analysis 1323
water waves—interaction with submerged cylinder 1324
wave breaking in random seas 1324
wave-damping effects of surface-active organic compounds 858
wave direction measurements 1843
wave groups in random seas 386
wave records—original surface disturbances 385
wave statistics—comparison 1315
zero-crossing wave heights and periods 1316

Offshore OTEC
general review 389
power plant design 859
review 1326

Offshore Oilfield Development
Alaska 766, 1231
Australia 286–288
Canada 1231, 1232
Caspian Sea 767
Cormorant 783
Ekofisk—the first 20 years 765
Gulf of Mexico 290, 291, 766, 1752
Mackensie Delta gas 764
Norwegian C.S. 293

Offshore Pipes and Pipelines
acoustic resonance 458
anchoring 864
Arctic environment 1263
Australian pipeline data 399
automatic sampling system 398
bottom-tow installation 1847
bundled flowlines 1847, 1849
chemical drag reducer 1850
circumferential throughwall crack 1333
coatings 1274, 1297
component life assessment 1338
computer-aided route engineering 862
concrete joint fill 1276
controlled depth tow method 1849
corrosion control survey methods 1329
corrosion—oblong flaws 1852
elastic analysis 1331
elastoplastic analysis 1334
external pressure and bending 860
Exxon's Santa Ynez project 1848
flexibility analysis 1340
flexible risers 391, 392, 1342–1349
flowline bundles 1847, 1849
fluid flow 563
hydroelasticity 394
inelastic tubes 860
isolating subsea pipelines 862
internal joint tester 861
joint testing 861
mitigating corrosion-accelerated fatigue 1339
mitigating stress-corrosion 1339
multiple side-branches 393
North Sea pipeline survey 397
pigging 1845, 1846
pipelay methods 1848
pipe-racking systems 1337
postbuckling analysis 390
prop imperfections 1853
residual stress 390
risers 1341–1350
Saltire to Piper connection 1849
seabed-structure interaction 396
shallow water pipeline surveys 395
subsea repair of concrete coating 1297
TARS—internal corrosion
TLP rigid riser 1350
thick-walled tubes—J. integrals 1336
toroidal elasticity 1335
upheaval buckling 1853
Vancouver Island project 865
vertical static loading 395
vibration 393, 394
Wei-Lui pipeline 1330
worldwide construction survey 1327, 1328, 1322

Offshore Platforms and Rigs
Arctic offshore structures 345, 1264
blowout control device 1807
concrete tubular jacket 1854
Condeep design 879
design review 405, 866
drilling rig directory—1991 402
FPSOs 406
floating production and offloading 406
floating production systems 401
FPSOs 1780, 1784, 1830, 1858, 1860, 1861
gravity-base structure 869, 879
jackups 404, 405, 1859
Jolliet project 867
mobile drilling unit replacement 400
monopod platform 787
natural ventilation in offshore modules 369
not-normally-manned—design 866
requalification of platforms 359
rig industry review 868
Seagull—jackup design with single leg 404
separator concept 1857
slant-leg jack-up 1859
technology reviews 1808–1813
TLP hydrodynamics 380, 1890
TLPs 380, 403, 867, 1350, 1856, 1890
tripod-shaped jacket 1854
turret-moored FPSO 1830, 1858
well tubulars—finishing and protection 1851
worldwide survey 1855

Offshore Power Generation
large motor drives—harmonic problems 407
OTEC—pilot power plant design 859
power systems for AUVs 1422, 1424
Wolf—energy system for underwater vehicles 1422

Offshore Production
barium sulphate scale formation 1251
Cohasset/Panuke start-up 332
current development activity 792
dehydrator units 253, 254
design options for North Sea facility 1366
hydrocyclones—upgrade water treatment 780
multiple hydraulic fractures 774
North Sea oil—PVT calculations 1744
postfracturing gas-well-test analysis 321
PVT calculations 1744
scale formation 1250, 1251, 1278
structural packing in dehydrators 253
vertical separator 779

Offshore Pumps
bottom-discharge pump 1811
multiphase 408

Offshore Research & Development
automatic underwater vehicle research 1427
GASP project 1258–1260
NOAA undersea research 1415

Offshore Reservoir Analysis
Brent Group reservoir characterization 1769
core breakthrough time 822
core analysis data 1769
field optimization 783
horizontal wells 322
interwell pressure test 782
post-hydraulic-fracturing well tests 321
pressure-transient data 320
production forecasting 1768
temperature profile prediction 781

Offshore Reservoir Simulation
adjacent borehole stability 326
borehole stability 325, 326
closed-chamber test 1770
Ekofisk compaction drive 784
front tracking method 1246
full-field reservoir model 323
horizontal wells 324, 1245
Kuparuk River field—Alaska 323
marginal-field development 1245
numerical modelling 1770
pore pressure depletion 325
thermal fracture simulator 785

Offshore Reservoir Technology
Archie saturation component 1257
blowout risk analysis 1772
brine injection 789
capillary pressure characterization 1252
completion overview 333–335
critical gas saturation 331
design criteria for horizontal wells 327
desulphurization unit 1247
drillstem tests 330
dynamic reservoir model 786
field-tracer tests 1771
gas hydrates 789, 790
gas-lift completions 1772

gas/oil contact monitoring *1253*
gas reservoir—flow test *1773*
gravel packs—pressure loss *788*
horizontal completions *1775*
hybrid fracture/gravel-pack completion *787*
hydrate dissociation *789*
H_2S removal from sour crude *1774*
horizontal wells *327, 329, 1249, 1253*
long-term production testing *1248*
permeability distribution *1771*
pore pressure effects *1252*
pressure gauges—permanent downhole *328*
pulsed-neutron monitoring *1254*
review—technology advances *791*
scale formation *1250, 1251*
solid-solution scale formation *1251*
solution gas liberation *331*
temperature effects *1252*
virgin rock temperature *330*
well-completion system *1249*

Offshore Safety
assessment and control *1352, 1358*
blowout control system *1807*
blowout risk analysis *1772*
computer-based protection systems *1368*
confidential incident reporting schemes *1355*
contingency planning techniques *416*
Cullen—distorted communication *1354*
detection systems—fire and gas *421*
diving chamber materials *418*
drilling systems—performance auditing *1372*
education and training *1353*
emergency shut-down valves *420*
escalation mechanisms *412*
evacuation process simulation *1369*
expert system for safety assessment *1361*
explosions in modules *1863*
fault tree analysis *414*
fire prevention *1371*
fire safety and loss prevention *410*
fire testing to API specifications *1373*
flame retardants *1952*
formal safety assessment—human factors *415*
gas dispersion and build-up *1365*
gas explosions—missile energy *419*
HAZOPS—modification *1370*
heat detector systems *1864*
human factors/ergonomics contribution *1356*
hydrocarbon leak modelling *413*
hyperbaric ignition *418*
immersion suits and lifejackets *870*
in-house team *1862*
leaks in enclosed modules *413*
lifeboats—free-fall *1374, 1375*
maintenance *1364*
Malaysia—safety *417*
multi-disciplinary approach *411*
North Sea helicopter safety data exchange *1357*
Petronas—upstream safety programme *417*
Piper Alpha *409, 1354*
plant in service—monitoring *1359*
platform safety inspections *1360*
platform evacuation—transfer system *1811*
process plant availability *1366*
process safety *1936*
quantitative risk assessment *411, 412, 1364*
reliability centred maintenance *1364*
response time to blowouts *416*
reliability data *1358*
reliability of software products *1362*
response to Cullen Report *1866*
risk assessment *410, 412, 1352*
safety and reliability aspects *871, 1351*
safety shutdown systems *1367*
submersible escape capsules *1865*
template manifold—reliability analysis *1363*
vapour cloud explosion study *1937, 1938*

Offshore Seals
stern tube seal *872*

Offshore Structural Engineering
advances in design and construction *1882*
ageing structures—reinforcement *1380*
Arctic environment *342–345, 348*
axial capacity of pipe piles *423, 896*
bending moment loading *1400*
buckling of cylindrical shells *1872, 1885*
buckling of shell structures *1870, 1872*
collapse behaviour *1883*
collision problems—dynamic elastic response *887*
composite cylindrical containers *1405*
composite materials *1405–1407, 1878, 1879*
composite tubular connections *1385*
computational stochastic mechanics *1891*
conductor guide design *426*
contractors—competition intense *1881*
crack growth under fatigue loading *1410*
cyclic loading *1403*
cylindrical shells—limit analysis *1402*
dented tubulars—strength *1394*
design aspects *876, 877, 1878*
development projects in Italian yard *1868*
displacement method for thin-walled members *1399*
ductile collapse *1878*
dynamic plastic impact *1887*
earthquake induced deformations *441*
Ekofisk protective barrier *429*
elastoplastic analysis *1403*
energy dissipation—TLPs *901*
environmental conditions *1878*
extreme value estimation *1867*
fabricated tubulars—beam column behaviour *1397*
fabrication costs—reduction *426*
fatigue and fracture *1878, 1884*
fatigue growth *1404*
fatigue reliability analysis *428, 1393, 1409, 1413*
fibre-reinforced composites *424, 892*
fire protection integration *873*
floating breakwater *1412*
floating pile groups—dynamic interaction *439*
floating production system design *874*
foundations *432, 440, 441, 895–897, 899, 1398*
foundations—geotechnics of fine-grained sediments *432*
general review *1878–1880*
gravity-base structures *869, 879*
grouted piles *436, 895–899*
grouted pile-to-sleeve connections *436*
grouted tubular connections *1385*
grouting versus swaging *435*
guyed tower platforms—parametric studies *431, 1388*
guyed tower reliability versus anchor pile failure *1388*
heavy columns—strength *1384*
idealized structural unit method *1886*
incremental load formulation *880*
inelastic response to earthquake excitations *1387*
inelastic shear of shells *1874*
installation guidance on design construction and certification *443*
IACS standard *1875*
jacket fabrication *875*
jackets—minimum weight optimization *889*
jacket structures—strength *1889*
load transfer for pipe piles *437*
materials and fabrication factors *1878, 1884*
modal vibration *1386*
mono-tower platform *428*
Morison-type wave loading *1408*
multi-articulated towers—response characteristics *900*
natural ventilation in modules *369*
nested reliability analyses *891*
non-uniform piles *444*
OTRC—research centre for offshore technology *433, 434*
open-toe piles—driving in dense sand *897*
orthotropic ellipsoidal shell *1401*
padeye—ultimate static strength *1390*
pile design *1892*
pile foundations—seafloor instability *885, 895–899*
pile groups—settlement *1377*

pile groups under lateral load *425, 442, 1376, 1873*
piles *423, 425, 430, 437, 439, 442, 444, 885, 1376–1378, 1381, 1892*
piles—axial capacity *423, 896*
piles—drivability prediction *1381*
piles—open-toe *897*
piles—reserve capacity design method *899*
piles—vertical vibration *444*
pore pressures *440*
pre-installed piles *430*
rate-independent inelastic response *892*
reserve capacity design method for piles *899*
response of TLPs in random waves *1411*
screw anchors in sand—uplift *422*
seismic settlements *440*
sensitivity measure calculation *890, 891*
shear log analysis *1399*
ship impact analysis *1888*
single-column platform—dynamic analysis *1383*
soil-pile interaction model *896*
soil plugging on pile driving *1381*
spatial variation of earthquake motion *879*
square-to-round tubular joints *1389*
stability analysis of square plates *1877*
stability of column lowered into liquid of higher density *882*
static offset configuration *883*
stiffened cylinders—buckling analysis *894*
stiffened cylinders—imperfections *893*
stochastic load combinations *427*
stress analysis *1391*
stringer stiffened cylinders *1869, 1871, 1885*
structural impact *1887*
structural monitoring *881*
structural redundancy *1876*
subsidence due to pumping *1379*
subsidence measurements *878*
system reliability analysis *880*
swaging versus grouting *435*
tank foundation tests *440*
TLP dynamics *1890*
TLP modelling *883, 901*
TLP response in random waves *1411*
TLP tendons and risers—asymptotic analysis *884*
tow and in-place fatigue *1409*
transverse force loading *1400*
tripod platform—differential settlements *436*
truss structures *1395, 1396*
tubular brace members—inelastic response *888*
tubular joints under combined load *886*
vector process out-crossing *890*
vibratory pile driving in sand *1378*
WASH—fatigue testing offshore structures *1413*
wave forces on multi-structures *1382*
welded tubular connections *1392*

Offshore Subsea Production

all-electric subsea well control *1781*
Balmoral development *328*
BOP *771, 1786*
BOP stack *1786*
completions *1783–1785, 1787*
concrete gravity templates *795*
control valves *1430*
economic evaluations *793, 1783, 1784*
FPSO *1780, 1784, 1830, 1858, 1860, 1861*
Gannet B *1261*
Garden Banks well *797*
gas condensate well *1787*
GASP project *1258–1260*
guidelineless lay away installation *336*
Gulf of Mexico—GLASS system *339*
layaway flowline *797*
Lyell satellite development *337, 1255, 1776*
maintenance and repair *362*
manifold installed on subsea satellite *1776*
marginal field development *1255, 1782*
market potential *1779*
modular riser system *1783*
multiwell drilling template *341*
near-surface completions *1783, 1784*
Ninian *1777*
pipelines *801*
riserless techniques *335*
sealants for subsea service *340*
Snorre development *794, 795, 1778, 1786*
Staffa development *1255*
subsea manifold *798*
tie-backs *1255, 1777*
tiebacks extend platform life *1777*
Tordis *798, 1256*
transportable waverider development system *338*
weldless coupling *796*

Offshore Transport

concrete tanker *1812*
ship manoeuvring control *1895*
support vessel fleet *1893*

Offshore Underwater Equipment

abrasive-water jet tool *1897*
AUV—fuzzy logic control *1910*
AUV multivariable sliding mode control *1909*
AUV power systems *1422, 1424*
AUV research *1427, 1428, 1907–1911, 1914*
AUV sensor configuration *1423*
AUV—trajectory and attitude control *1911*
deep sea jet cutting application *1900*
diverless flowline tie-in *1426*
diverless-maintainable insert valves *1809*
diverless subsea connecting tool *1414*
explosion technology *1906*
flame jet cutting of concrete *1902*
frictionless stab plate *1912*
HYDROSWEEP *1419*
hyperbaric testing of jet cutting *1901*
impact of API-17 standards *447*
jet cutting research *1898*
jet cutting technology *1896–1902*
manipulators *1421*
marine craft—modelling and control *1907*
NOAA research *1415*
neural network underwater vehicle control *1908*
PARASOUND *1419*
pipe stub removal *1903*
power systems for AUVs *1422, 1424*
robot guided jet cutting *1899*
ROV surveys *448*
ROV vision *1416*
real-time photogrammetry *448*
seabed mapping and imaging system *1418, 1419*
seabed pressure gauges *878*
separator/booster *1808*
Sonsub technology *1913*
submersible vehicle design *449*
subsea control systems *1905*
subsea inspection—automated *1421*
SMURV—swath multipurpose research vessel *1420*
TOBI—towed ocean bottom instrument *1417*
ultrasonic biotelemetry *1425*
video picture quality *1904*
Wolf—underwater power system *1422*

Offshore Valves

asbestos-free valve packing *1434*
Brent gas risers—ESDVs *450*
ceramics in valves *1433*
choke valve—adjustable *1808*
developments—survey *1429*
subsea insert valves *1809*
electric activators *1439*
emergency shut-down *420, 450*
fine testing to API specifications *1373*
globestop valve for hazardous liquids *1431*
globe valve for flow interruption testing *1440*
globe valves—cavitation *1442*
metal-seated ball valves—sealing techniques *1435*
selection by optimum flow characteristic *1436*
safety and relief valve modelling *1438*
selection of process control valves *1437*
solenoid powered control valve *1432*

subsea control valves *1430*
valve actuator diagnostics *1441*

Offshore Vibration
cancelling noise with noise *902*
catenary marine risers *454*
cleaning fabric-filters *456*
cylinders *451, 452, 460*
cylindrical structures—modal vibration *1386*
flow-induced *372–374, 393, 394, 451–460*
marine drilling *453*
nonlinear *452*
nonlinear interaction *1917*
non-uniform piles *444*
orifice plates as vibration source *459*
oscillatory flow *451, 452*
parametric interaction *1917*
PerCon—measurement and analysis *1915*
pipeline acoustic resonance *458*
piping systems *393, 394, 458, 459*
plates in marine structures *903*
random response of flexible, uncertain beam element *904*
risers *454, 455*
saddle-supported vessels—seismic loading *1443*
stream-wise *457*
stringer stiffened cylinders *1869*
TLP tethers *380*
tether cables on underwater vehicles *1270*
torque feedback system *1812*
transversely vibrating cylinder *451, 1916*
vortex-induced *453, 454, 456*

Offshore Wave Energy
Chinese wave-power plant *1445*
UK wave power station *1444*
wave-energy device control *462, 463*
wave energy device—hydrodynamic coefficients *1446*
wave load calculation and measurement *1444*
Wells turbine *461*

Offshore Welding
analysis of welded tubulars *1392*
copper–nickel butt welds *852*
corrosion *1282*
crack in welded joint region *1918*
electrochemical machining for defect removal *1450*
failure assessment diagrams *1448, 1449*
flat plates and pipe/plate joints *1448*
fatigue data *360*
postweld heat treatment *1447*
sampling and defect removal *1450*
steel weldment properties—prediction *905*
tubular joints *1448*

Petrochemicals
Asian economic growth *469*
market outlook *655*
Mexican industry reforms *953*
process handbook *275*
synergies with US refineries *631*

Pipes and Pipelines
backhoe-loader *1629*
biaxial loading *1635*
bitumen transportation *607*
Brazil—installations *1106*
Canadian construction activity *161*
cased/uncased line crossings *153*
cast iron—maintenance *597*
chemical treatment *134*
coatings *1062–1064, 1066, 1605*
communications *1623, 1628*
compressor performance *1630*
computer-aided route engineering *862*
control and monitoring system *164*
corrosion *910, 911, 1072*
curved pipe *1634*
cyclic stress *1095*
data acquisition system *601*
design *1627*
design code rules *1096*
double-containment systems *1097*
dual-fuel capacity engines for heavy crude line *168*
dynamic response due to incident shear wave *172*
elastic calculation *1116*
El Paso Natural network *154, 155*
environmental aspects *1536*
ethylene pipeline inspection *132*
expansion joint fatigue *1095*
fatigue *1095, 1096*
fibreglass tubulars *1098*
flow improvers *169*
fluid flow *563*
gas *134, 135, 148, 150–155, 157–161, 165–167, 170, 597, 600, 1098–1100, 1103–1105, 1110, 1112–1114, 1620–1624, 1626–1628, 1631–1633*
gas construction productivity *151*
gas supply optimization *1620*
gas transmission loop construction *157*
helical pilings *1113*
high-pressure water jetting *171, 592*
hot-tap method *1102*
hydrogen-induced-cracking *1099*
incident command system *162*
insulated fuel oil *163*
insulation *1107*
Italian natural gas system *166*
Kern River system *148, 158, 602, 1100*
leakage and loss *1633*
leak detection *1078, 1082, 1083, 1094, 1613, 1633*
live gas main insertion *135*
Loma Prieta earthquake response *608*
maintenance *131–135, 163, 171, 592, 597, 598, 600, 1078, 1079, 1082, 1083, 1094, 1109, 1611–1614, 1616, 1621*
Mojave's gas transmission line *167*
pigging *131, 1078, 1079*
pipe-to-soil potential readings *1108*
PIPE TRONIX corrosion tool *600*
polyethylene *150, 1109, 1115*
polyethylene liners *1109*
pressure point analysis *1094*
primary-creep crack growth *1636*
Questor operations *170*
reciprocating compressors *603*
repair in-service *598*
repair using epoxy-filled shells *133*
safety regulations *156, 1619*
satellite communication *165*
section ovalization in calculation *1116*
shear wave excitation *172*
Soviet Union construction *1103, 1104*
stray current monitoring *1111*
three-point bending *1634*
Trans-Asian—prefeasibility study *606*
transient surge control *1101*
UK multiproducts system *1625, 1632*
US/Canada pipeline activity *1112*
US construction activity *160, 599*
US construction survey *599*
US natural gas projects *1110, 1626*
US $1.5 billion pipeline extension *1114*
worldwide construction *159, 604, 605, 1105, 1624*

Pollution
air *478–480, 971, 1478–1483, 1956–1960*
air pollution detection *1958*
ammonia removal from refinery waste *484*
ammonia storage for NO_x control *971*
Arabian Gulf *1484*
Ashland refinery waste water treatment plant *976*
atmospheric nitrous oxide *1960*
automotive emission *1951*
biotoxicity of produced water discharge *1962*
CO_2 reduction *480*
car exhaust gas treatment *478*
catalytic converters *478*
Centre for Waste Reduction Technologies *487*
Coast Guard regulations *479*
cost-effectiveness of refinery waste treatment processes *977*
diesel fuel biodegradation *481*
dissolved air flotation units *975*
environmental audit—computerized *1957*
EPA regulations *978*
felt as efficient oil absorber on skimmer *1485*
fluidized-bed emissions *1479*
fossil-fuel-based plants *480*
fugitive loss monitoring *1958*
gas detection techniques *1958*
gas fired engines *1956*
gasoline vapour emission controls *1955*
greenhouse-gas emissions *1957*
ground water protection procedures *972*

hydrocarbon biodegradation *482*
inner liners for waste containers *1963*
land *83, 481, 482, 972*
land-based drilling *1961*
methane—greenhouse gas *1480*
methane leakage *1478*
National Pollutant Discharge Elimination System (NPDES) *976*
nitrous oxide *1482*
processing plant discharges *1487*
refinery sludge disposal *978*
refinery waste *484–486*
research and development *1958*
sea *317, 446, 479, 483, 973, 1484, 1485*
secondary containment *486*
Shell's Martinez waste reduction review *974*
sinks for atmospheric methane *1481*
soil *481, 482*
stormwater regulations *1487*
sulphur dioxide emissions survey *1959*
tankers—prevention and response *973*
tank farms *486*
Turkey—emission control strategy *1483*
UK refuse disposal policy *1486*
US oil spills—Marine Spill Response Corporation *483*
waste products control *83, 484–487, 974–978, 1486, 1487, 1961–1963*
water *975, 976*

Polymerization
fuzzy control *233*
polymer grade TBA *1178*

Power Generation
gas turbines *149*
generator at well site *173*

Production
flare network design *1006*

Properties, Chemical and Physical
energy determination equipment *242*
pressure dependence fluidity *244*
rheology of Saudi crude emulsions *245*
R22/paraffinic oil mixtures *243*
solubility equation *243*

Pumps
beam-pump system *611*
beam-pump parameters *1117*
centrifugal pumps *609*
downhole dynamometer cards *1118*
dynamic data *1117*
glandless *1637*
jet pumps—modelling and design *610*
new developments *174*
packing and mechanical seals *609*
pump seal retrofit *1080*
sucker rod pumps *1118*
three-throw plunges pump *1119*

Refineries
absorption chillers *1662*
automation *1658*
baseload LNG plant *1152*
boiler operations *1137*
bottle sizing formulations *625*
catalytic reformer unit *1142*
cleaner products *1645*
Clyde refinery, Australia *1134*
control *1134, 1136, 1151*
compressor—troubleshooting *1150*
cost estimates *1651, 1652*
counterflow cooling towers *197*
creep buckling *1664*
cryogenic gas plants *194*
delayed coking units *1653*
demethanizer column—debottlenecking *1147*
distributed control system *1151*
emission reductions *623*
energy efficiency analysis *198*
ethylbenzene plant optimization *199*
exchanger expansion design *1138*
exchanger U-tubes—vibration *196*
exchanger waterlogging prevention *1148*
fans—cooling tower *626*
flare design *200*
fcc vapour recovery unit upgrading *1146*
foam inhibition *1648*
fractionator—modular multivariable control *184*
fugitive emission control *1654*
gas turbine integration *1145*
heat recovery steam generators *1128*
hydrodesulphurization plant *1643*
hydrogen production capacity *1660*
information management system *1659*
insulation—punking prevention *1155*
integrated control and management *187*
laboratory information—communication with management *186*
mechanical seals *1654*
membrase-based hydrogen recovery *183*
multiphase catalytic reactors *202*
multiphase reactors *202, 203*
non-asbestos sheet gasketing *191*
nonlinear processes—advanced control *192*
non-destructive testing *1143*
nozzle openings *1646*
nuclear reactors for heat supply *201*
operational optimization *1647*
pressure vessel maintenance *466*
pressure vessel failure *1142*
problems—case histories *181, 182*
process column problems *181, 182*
process control *185, 192, 1649*
process cooler fans *626*
process design *629*
process variable optimization *628*
real-time statistical process control *1649*
reciprocating compressors *625*
regulatory statutes *193*
safety *1644, 1653*
second-round incremental controls *1134*
security aspects *627*
simplified model predictive control *1136*
site selection *630*
sour water design—charts *624, 1139, 1140*
spherical caps—buckling collapse *1141*
steam heating *1149*
steam system analysis *195*
steam turbine blade failure *190*
stress analysis *1138*
Super Claus—99 process *1144*
synergies with US petrochemicals *631*
tail gas treater *1650*
temperature—real-time analysis *1663*
thermal fluid heating *1149*
trickle-bed reactors *203–205, 230*
worldwide construction study *180, 1157, 1661*

Refining
CO_2 removal *188*
Claus/Clintox combination *1650*
Clintox process *1650*
delayed coking *1154*
environmental concerns *206, 1144, 1156*
integration with petrochemicals *631*
membrane/amine hybrid system *188*
mutations *632*
heavy vacuum gas oil *1136*
Lo-Cat 11 process *1153*
quality control *1655–1657*
quality control standard *1655*
saponification *189*
sulphur recovery regulations *1144*

Research and Development
AQIRP—auto/ore quality improvement research programme *687*
GESAMP—environmental assessment *317*
Gas Research Institute *1017*

Reservoir Analysis
alkane gases *1556*
ARIMA method *1555*
automated well-test analysis *1031*
CAPE *1027*
capillary pressure curves *566*
core Archie-parameter estimation *1027*
crude oil characterization *1561*
crude oil reserve estimation *1555*
cyclic-steam models *1029*
in situ combustion *97, 98*
core permeability *101*
electrical wellbore images *106*
fractured reservoir evaluation *105, 106*
geopressured gas reservoirs *565*
gravity drainage improvement *1028*
horizontal wells *99, 1560*
hydrate dissociation *572*
infill-drilling *1553*
interwell tracer test *95, 96*
permeability *570, 1560*

perturbation analysis *104*
pressure build-up *99*
pressure derivatives *568, 1559*
pressure estimation *570*
pressure-transient response *569, 1030, 1040*
primary pressure derivative *1559*
porosity *101*
pseudo-skin factor *571*
residual oil saturation *95*
state-of-the-art *100, 105*
streaming potential *1557*
stress factors *101, 104*
tight carbonate intervals *570*
tight-gas-sand evaluation *1554*
transient pressure *1558*
transient testing *100, 1558*
trapped gas *1552*
viscosity variation—depth related *94*
water-soluble additives *98*
well-test-analysis—advances *1551*
well-test-analysis problems *102, 103*
wettability *567*

Reservoir Simulation
adaptive-implicit compositional *1574*
automatic grid generation *1570*
CO_2 flooding *1573*
coalbed methane reserve evaluation *576*
compositional modelling *66, 574, 577*
discovery rate—modelling framework *1567*
dual porosity model *53, 1575*
electrical resistivity *65*
EOR *64*
equation-of-state *1033*
exact block radius *61*
field-scale *1037*
flow hydraulics *62*
formation damage *1571*
gas reservoir/gathering system *54*
geological models *1569*
gravity drainage *53, 575*
heterogeneity *1564, 1569, 1570*
history matching *1566*
horizontal versus vertical sweep efficiency *56*
horizontal-well performance *579, 1035, 1037*
inactive block removal *1036*
injection process *1571*
kick control *1562*
miscible displacement *66, 1564*
oil sand stress-strain *55*
polymer flooding *1571, 1572*
prediction of uncertainty *1565*
PVT correlation *1038*
pseudocomponent selection *574*
relative permeability *573*
sand control *60*
sandstone acidizing *1568*
solvent bank design *1034*
state-of-the-art *59, 65*
steam-foam recovery *1576*
stochastic modelling *57, 1032*
sweep efficiency comparisons *56*
temperature fall during cementing *58*
thermal wellbore model *62*
3-D reservoir visualization *578*
two-phase immiscible model *1563*
well-temperature profile *58*

Reservoir Technology
asphaltene adsorption/desorption *120*
average permeability *1052*
bimodal polymer brush *1579*
blowout capping—Iran *122*
BOP performance *124*
blowouts *123*
bottomhole sampling *1054*
capillary heterogeneity *1602*
capillary pressure curves *585, 1047*
capillary suction technique *1043*
cased horizontal wells *581*
clay stabilization *117, 1591*
completion techniques *1589*
control chart design *1588*
desorption characterization *583*
deviated rod-pumped wells *1594*
effective stress law *1597*
flashing phenomena *116*
foam mobilization *1580*
formation volume factors *1587*
gas and condensate recovery *584*
gel plugs *1044*
geomechanical tests *1586*
Glyoxal—H_2S scavenger *129*
gravity drainage *1583, 1585*
gravel-pack materials—thermal stability *1582, 1590*
gravity segregation *1049*
grid refinement technique *1042*
Helmholtz energy expression *1603*
horizontal wells *581, 1055, 1585, 1589*
hot oil injection *128*
hydraulic fracturing *1599*
inhibition programme *1045*
in situ combustion *112, 586*
interlamellar water estimation *1577*
isenthalpic flash calculations *113*
kick fluid—application of mass balance *125*
linear aquifers *1056*
linear flooding experiments *1050*
low-permeability formations *117*
Meshrite filters *114, 115*
mineable oil sands *1057*
mixed-wet pastes application *1583*
multivariate optimization *1595*
near-critical phase behaviour *1601*
nonlinear coupling *1596*
paraffin removal *128*
permeability damage *1525*
phase behaviour *119*
polymers—behaviour *1592*
probabilistic reserve estimates *118*
relative permeability restoration *126*
reservoir fluid properties *1054*
reservoir management data *1039, 1041*
retrograde gases *1051*
saturated steam properties *1600*
shaly sands—electrochemical activity *127*
shear-wave porosity logging *1053*
solid/liquid interfaces *1581*
solids filtration *114, 115*
stratified reservoirs *1049*
sucker-rod pumping *116, 1593, 1594*
surfactant systems *1578*
thermal processes *116*
two-phase compressibility factors *1051*
two-phase relative permeability *1046*
water flow detection behind pipe *1584*
well-data acquisition system *582*
well performance model *1048*
well testing in Alberta *580*
wettability *121, 567, 587, 1598*

Safety
aerosol formation *1638*
chemical plant—computerized control *1948*
chemical plants *1644*
chemical safety audits *918*
damage criteria—explosions *1949*
emergency planning *1459*
fire field model *1460*
fire resistant fluids—flammability and storage studies *1454*
fire risk model *177*
flame retardants *1952*
hazard study procedure *1947*
Hazcheck database *1946*
HAZOP *1120*
HSE studies of accident/incident reports *1948*
information—site of plant leak *1121*
major accidents—historical review *1456*
management of hazard and risk *1458*
Phillips Pasadena explosion—lessons to be learned *176*
process safety *1936, 1943, 1944*
project safety management *919*
risk-assessment in plant design *1457*
Shell fluoroaromatics explosion *1939*
transport of industrial chemicals *1941, 1942*
trip system configuration *1945*
valve and piping safety factors *920*
vapour cloud explosion study *1937, 1938*
vessel failure *1940*
Watt Committee report *1455*
workplace guidelines *175*

Seals
carbon ring seals *612*
mechanical face seals *613, 1654*
mechanical seals in pumps *609*
seal design *1654*

Shale Oil Production
shale-derived middle distillates *635*

Solvent Extraction
cyclohexene solubility in aqueous sulpholane mixtures *1682*
furfural—extracting properties *1683*
N-methylpyrrolidone—extracting properties *1683*
wax crystallization modification *649*

Special Processes
acrylonitrile production *1181*
auto oxidation of sec-butyl toluene *238*
biomass thermochemical conversion *1180*
butane pyrolysis *1186*
chemical membrane reactors *1689*
ether synthesis *651*
ethyl benzene to styrene *652*
H_2O generation *654*
hydrogen-atom substitution *1183*
kerogen pyrolysis *1184*
kinetic modelling *1684*
methane—oxidative coupling *1686*
methane partial oxidation to methanol *657*
methanol from biomass gasification *662*
methanol synthesis *656*
NO_x removal from flue gas *1685*
Octol process *1735*
oxidative coupling of methane *237, 657, 659*
oxidation of higher hydrocarbons *1684*
partitioning of N-species *653*
propane pyrolysis *1182*
styrene synthesis *650*
syngas *1687, 1688*
Standards
grease classification *1713*
ISO 6743-9 *1713*
ISO 9000 *1655*
quality control *1655*
longitudinal strength standard *1875*
Storage
annual survey—bulk storage *1640*
elevated liquid-storage vessels *614, 1123, 1124*
environmental aspects *1536*
natural gas *619*
salt deposit cavities *179*
underground *179, 619*
Structural Engineering
creep of structures *1126, 1664*
fatigue damage *615*
glass fibre reinforced plastic *618*
orthotropic composite beams *617*
stochastic models for fatigue damage *615*
woven glass composites *618*
Tankers
manoeuvring control *1895*
prismatic structures *1894*
spill prevention by design *446*
VLCC structures *445*
Tanks
above ground *1123, 1124, 1641*
cathodic protection *1123*
cleaning of tank cars *1127*
elevated liquid storage *614*
evaporative loss *1641*
external corrosion control *1124*
flat bottom cylindrical *1125*
integrity *1639*
LNG *1639*
seismic design rules *1125*
seismic reliability analysis *614*
storage space in Europe *1640*
tank shell—sequential lifting *1122*
Terminals
Milpitas replacement *178*
Thermal Cracking
ASVAHL process *1665*
Butacracking process *1667*
carbon deposition *211*
ethane pyrolysis reaction *211*
ethylene production *637*
heavier crude blends *1161*
hydrocarbon pyrolysis data *1160*
HYVAHL process *1665*
olefin production *1666*
paraffin pyrolysis *1159*
TERVAHL process
visbreaking—advanced process *638, 1668*
Training
computer-assisted *477, 966*
computer-based training *1933*
computers for undergraduate instruction *966*
offshore—education and training *1353*
emergency response *1932*
employee performance review *963*
engineers—possible US shortage *1476*
for effective technology transfer in developing countries *967*
gas distribution *1475*
human resource utilization *965*
inducing the investigative process *489*
operational personnel *1933, 1934*
project management *964*
simulators for gas distribution *1475*
technology transfer in developing countries *967–970*
transportation of natural gas *477*
visual aids *489*
Transport
cleaning of tank cars *1127*
safety of industrial chemicals *1941, 1942*
training for natural gas transportation *477*
Tribology
additive interaction *760*
alumina ceramics *718*
bearings *265, 699, 700, 704, 707, 711–713, 715, 717, 720, 1203, 1210*
ceramic cutting tools *714, 742*
composites *1206–1208*
contact fatigue *1202*
eccentric cylinders—flow *711*
elastohydrodynamic lubrication *703, 722, 1201*
friction mechanisms *706, 1205, 1207*
gear tooth friction *706*
hydrodynamic lubrication *704, 709, 710*
ion-beam mixing of Fe/B layers *702*
nickel-based superalloy *701*
pin-on-ring tester *1202*
rotary-percussion drill-bits *1204*
scratching of composites *1206*
self-lubricating powder metallurgy composite *719*
silver on zirconia ceramics *741*
surface asperities *708*
surface-initiated spalling fatigue *700*
thermosetting polyester *716*
Ti-carbide coatings *744*
Ti-nitride coatings *744*
turbopump bearings *1203*
wear studies *705, 714, 718, 741–744, 1204, 1206–1208, 1215, 1219*
zinc phosphate/stearate coatings *1209*
United Kingdom
refuse disposal policy *1486*
United States
Canada–US Free Trade Agreement—oil and gas implications *959*
downturn in E & P activity *1925*
drilling survey *1473, 1926*
economic recession—effects *1472*
energy policies—effect on import demand *957*
federal environmental laws *1537*
gasoline and the US—prices reach record low *948*
gas supply and prices—long-term trends *947*
natural gas industry 1990 *945*
natural gas pipeline projects *1110*
1990 oil demand *944*
oil/gas production cost changes *956*
oil import vulnerability *946*
$1.5 billion pipeline extension *1114*
pipeline activity—rapid pace *1112*
reaction to Mexican petrochemical industry reforms *953*
refining—productivity growth *1463*
USSR
EOR techniques *539*
joint ventures—investment risk *926*
pipeline construction *1103, 1104*
West Siberia *13*
Valves
ceramic valves *1131*
digital valves *1129*
excess-flow valves *1130*
for reduced emissions *621*
glandless *1637*
precise position control *620*
pressure relief valve *1642*
sliding-plug surge relief *1101*
Vibration
torsional *622*
Welding
in situ weld overlay *1132, 1133*
non-destructive testing *1143*
vessel corrosion repair *1132, 1133*
